Interaction Patterns

$\left\{ \begin{array}{l} \text{if } D_1 == B \wedge D_{13} == 0 \wedge D_{cc} == 1 \text{ then } \Phi \\ D_{cc} \rightarrow \text{Next} \\ D_1 == B \wedge D_{13} == 1 \wedge D_{cc} == 0 \text{ then} \\ D_{cc} \rightarrow \text{Merge} \end{array} \right\}$

Some Decision

Some Decision

Represents
 State of
 Current Head
 all the time

Random

Create linear structure 1

Select 1

Sequentially set Local context
Join context

~~move~~

evaluate

move to linear from structure 1
to structure A or B

Select context A

~~Q) reuse Structure 1 -~~

~~evaluate~~

Select Next on context A / Join context

Remove from A

Evaluate

Join Sequential context B

Disconnect context

Q) reuse A?
