kwds: simulation, building blocks
Synthesis

Synthesis_cc1

sweet spot --
think bell curve of ratios
where the world / simulation
is interesting at center of bell

Mind

have similar building blocks

of

World

has

models

aggregate

sub models

Simulation

has — constrained scope

has

information

is a form of

block

is a block in ???

of

ratio

represents

????

function execution

subspaces

are input to

produce

are used for

function definitions

is a

f1

f2

of

ratio

represents

????

of

ratio

represents

compression

Keys: Creating a machine capable of
simulating interesting worlds or
worlds similar to the world in which
we exist ...

Results in a machine w/ the fundamental
building blocks required to make a machine
that interacts productively w/ the world
in which we exist

Ratios are key
